

Innovative Pre-Applied Adhesives & Sealants for Fasteners & Assemblies

Ship us your fasteners. We'll apply your requested material and send them right back!

THREADLOCKING

ND PATCH

Nylon powder fused to fastener threads for locking, sealing, and adjusting.

ND PATCH HI-TEMP

High temp nylon powder fused to fastener threads for locking, sealing, and adjusting.

EXPAND-A-LOCK

Unique microcap adhesive that expands on installation filling gaps & voids in threads.

VIBRA-TITE VC-3

Synthetic resin that absorbs vibration and is adjustable, removable and reusable.

ND PELL-IT

Nylon plug, inserted in fastener threads for locking, sealing, and adjusting.

ND STRIP

Nylon bar inserted into fastener threads for locking, sealing, and adjusting.

EPOXY-LOCK

Epoxy resin and hardener which combine on installation to lock and seal fasteners.

ND MICROSPHERES

Micro-encapsulated adhesive applied to fastener threads, for locking and sealing.

THERMOLOC

Highest temperature chemical threadlocker available. Cures to withstand up to 1500°F

SEALING TECHNOLOGIES

ST-3

Thread sealant for straight or tapered threads with excellent chemical resistance.

ND PLASTISOL

Underhead seal that fills in threads and retains integrity, even when nicked or cut.

SEALTEK

Resilient, soft and flexible gasket with excellent automotive chemical resistance.

THERMOSEAL

Reactive medium strength high temperature sealant for high pressure applications.

BI-SEAL 0630

Wax based material which seals sheet metal holes on installation of the coated fastener.

MASTICS & EXPANDABLES

Materials to prevent metal-to-metal contact, vibration, & noise-related problems.

LUBRICATING AND MASKING

ANTI-SEIZE 917N & 957

Pre-applied lubricant to prevent galling of metals at high temperatures.

ND LM-1293

Torque tension control lubricant that prevents undesirable substances from adhering.

SPECIALTY COATINGS

Range of materials designed for lubrication, corrosion resistance, temperature protection, torque tension modification and more.

EZ-DRIVE

Synthetic resin designed to reduce installation torques on threadforming fasteners.

THREAD ARMOR VC

Advanced anti-galling and lubricating thread coating designed primarily for stainless steel.

ASSEMBLY AIDS

ND PELL-IT SOFT TOUCH TIP

Nylon or Brass tip on fastener for secure "grip" without damaging mating parts.

ND STAY-PUT

Temporary fastener retention device, useful for modular assemblies.

ND COLOR CODE

Paint, dye or ink that is applied to a fastener to aid in assembly & inspection.
