

Product Declaration: EU REACH SVHC Candidate List

Dear Valued Customer:

REACH Regulation (EC) 1907/2006, Article 33 requires companies who supply products that contain more than 0.1% by weight of any REACH Candidate List Substance (SVHC) to provide their customers with "sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance."

As of the date of this letter, there are 209 substances included on the candidate list (SVHC).

To the best of our knowledge and with considerations to the latest candidate list and current information collect through our supply chain, most products provided, supplied, and/or applied by ND Industries, Inc., do not contain any SVHC above reportable quantities. However, there are few exceptions: a limited number of products contain a SVHC as listed in the current version of the candidate list. Please refer to below table for products that contain SVHC material. Furthermore, this compliance statement only applies to the products manufactured and applied to a fastener or substrate and not the fastener or substrate itself.

For products sold in the EU containing a SVHC at >=0.1%, the substance is listed in section 3 of our EU Safety Data Sheet. If you require further information about content below the 0.1% threshold please contact ND Industries, Inc.'s Environmental, Health and Safety Department by using the following email address ehs@ndindustries.com.

Table with 4 columns: ND Industries Product Name, Chemical Substance Name, CAS Number, Substance amount (wt%). Rows include ND LM-1293, ND Mastics, ND Plastisol, SealTek, Epoxy-Lock, Stay-Put, Thermoloc, and ND Galvanic Barrier Powder Coating.

Sincerely,

Ajay Jain

EHS Manager
