

ND M97 Technical Data Sheet

Description:

ND M97 is a non-reactive elastomeric-based non-expandable sealant. The material is designed to provide good adhesion and sealing characteristics to a variety of metal, e-coated metal, and nylon substrates. **ND M97** meets Chrysler MS-CD-69

Typical Properties:

- Color: Black
- Specific Gravity: 1.84 g/cm³
- Non-Volatile Content: 99 % minimum
- Flash Point > 430 °F
- Volumetric Expansion: 100 % minimum
- Water Absorption: < .5%
- Needle Penetrometer: 3.5 mm
- Shelf life: 6 Month

Application:

ND M97 is ideal for gap filling and sealing. Unlike plastic, rubber, and other “washer” materials that often fail to seal completely when torqued into place, **M97** is crushable and consistently provides reliable gap filling and sealing.
